### Message from the Guest Editors

The most recent computer vision and machine learning techniques can be applied to deliver smart solutions to various sustainability issues related to environment, agriculture, energy, transportation, waste management, urban planning, among others.

In this Special Issue, original research articles and reviews in CVML for smart sustainability are welcomed. Research areas may include (but not limited to) the following:

- Environmental issues: promoting sustainable food systems, limiting water pollution, and enhancing air quality, etc.
- Agricultural issues: crop health analysis, pest and disease detection, and irrigation systems, etc.
- Energy issues: reducing energy consumption, detecting energy losses, and predicting its demand, etc.
- Transportation issues: traffic management, improving services, reducing emissions, and vehicle management, etc.
- Waste management: improving waste collection, detecting and sorting recyclable materials, and reducing waste contamination, etc.
- Urban planning: analyzing urban landscapes, forecasting urban expansion, issues regarding smart cities, deployment, optimizing land usage, etc.
- Any related sustainability issues.

an Open Access Journal by MDPI

Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
